**Re: Comments on the Scope of the Environmental Impact Statement for the Tacoma Manufacturing & Marine Export Methanol Refinery**

Dear Mr. Munce:

I am submitting comments regarding the scope of the Environmental Impact Statement (EIS) assessing the impacts of NW Innovation Works' proposed natural gas-to-methanol refinery, storage and export facility at the Port of Tacoma.

I'm writing because I am deeply concerned about NWIW's proposed methanol refinery in Tacoma.

**Write your concerns in the form of questions here (e.g. water demands, electricity and fracked gas usage, increased utility rates, air pollution, water pollution, dangers associated with catastrophic events, negative economic consequences to city, home values, NWIW liability insurance, dangerous and polluting diesel chemical tanker traffic on the Sound, vicinity to the LNG storage tank and TPU oil trains, pollution and greenhouse effect due to hydrologic fracking, plastic pollution in China,…). You can send more than one letter, but keep individual letters to two pages.**

Thank you for considering these comments. Please include my comments in the record and notify me of any action taken.

Sincerely,
